Create, Review, and Publish Your First Publication

Before You Begin

Tridion Docs CCMS uses Single Sign-On (SSO) for authentication. Request access from the Content Operations team. Once you have access, open Tridion Docs from the Okta dashboard or go directly to Organize Space. Tridion Docs works best on the latest stable version of Google Chrome or Microsoft Edge.

Duplicate a Publication in Organize Space

Duplicate an existing publication or publication template to create a new publication. A duplicate retains the original's structure and components, which you can edit while leaving the original unchanged.

1. In Organize Space, go to **Content** > **Structured Content** and find the publication you want to use as a starting point. Sample publications are available in Training.
2. In the list of publications, select the one you want and click **Duplicate Publication**.
3. Select the folder where you want to store the duplicate. The target folder must have a content type of **Publications** or **None**.
4. When prompted with **Do you want to reuse images?** choose the option you want:
   - **Yes**, reuse the same image files across publications, so changes you make are reflected in both (recommended)
   - **No**, duplicate images, so changes to the new images do not impact originals
5. Refresh the folder to see the duplicated publication and its components. If the target folder doesn't already contain folders with content types **Maps** and **Topics**, the system creates them.
6. Select the publication click **Open in** > **Draft Space**.
7. Update the required properties for each map in the new publication:
   - Version Number
   - Publication Date
   - Book Restriction
   - Document Type

   Note: When publishing a PDF, values set on the primary map take precedence over values set on other maps in the publication.

Edit Content in Draft Space

Use Draft Space as your primary workspace for content development before publishing and sending content for review. In Organize Space, locate the publication you want to edit.

Text

1. Place the cursor where you want to add or edit text and then type your changes.
    - To format text or insert a list use the options on the **Start** tab.
    - To insert a note, from the **Structure** tab select **Note** > **Generic Note**.
    - To insert a cross reference, from the **Inline** tab select **Link** > **Cross-link** and navigate to the topic you want, select it and then click **Insert**. Enter the link text or leave it blank to use the topic title.
2. Click **Save** or press Ctrl + S after making changes.

Tables

1. To insert a table, select from the **Structure** tab select **Table** > **Generic Table** move the mouse over the grid to select a table size.
2. To make adjustments, place the cursor in the table cell you want to update and use the options on the **Table** tab.
    - Add or remove rows or columns
    - Split or merge selected cells
    - Apply or remove header formatting for rows or columns
    - Align cell content to the left, right or center

Images

1. To replace a placeholder image, right-click it and select **Replace**.
2. Navigate in the repository to the image you want to insert, select it and select **Insert**.
    - From an image folder, you can also click **Add new** to upload an image you have stored locally and insert it into the publication.
3. To resize the image, select it and open the **Attributes** panel.
    a. For a fixed width, enter a value for **Width** that uses standard units, such as 300px, or 6in. (The height adjusts automatically to maintain the image's proportions.)
    b. For a relative width, enter a percentage for **Scale**, such as 70.

New Topics

1. In the publication outline, locate the component under which you want to add a topic.
2. Right-click the component, then select **Insert Component**.
3. Locate and select the folder where you want to save your new topic.
4. Click **Add new** > **Topic**.
5. Complete the **Add new** steps:
    a. Select the type of topic you want to create from the list of available types.
    b. Enter a title for your topic and any other properties and then click **Save**.
6. Select the new topic in the list and click **Insert**.

^ Publish a Draft PDF in Organize Space

As you work on a publication, you can generate a corporate-branded draft PDF at any time to preview the layout, fonts, and images.

1. In Organize Space, go to **Content** > **Structured Content** and locate the publication you want to publish.
2. Double-click it to open the detail view. The detail view lists all publication versions and the available output formats for each version.
3. If needed, add a new publication output. Select the publication version number, click **Add Output,** select the output format you want and then click **Save**.
4. Select the check box for each output you want and click **Publish**. As the output is generated, its status changes from Pending to Publishing to Draft.
5. When the output is ready (**Draft**), select it and click **Download**.

Prepare and Send Publication for Review

Before you send a publication to designated reviewers, update the topic status to indicate draft is ready for review.

The review workflow progression: **Draft** → **To Be Reviewed** → **Review Complete**

1. Open the publication in Draft Space.
2. Change the workflow status of specific topics that need review. Select the dropdown showing the current workflow status of the topic (**Draft**) and selected the desired new workflow status (**To be reviewed**) from the dropdown.
3. In the publication outline, right-click the primary or top-level component and select **Copy link for Review Space**.
4. Send the link to your reviewers.

Add Feedback to a Publication in Review Space (Reviewers)

Note: The instructions on this page are intended for the content authors. If you are an assigned reviewer, see Review a Publication.

Resolve Feedback to a Publication in Draft Space

Work through reviewer comments and suggestions, update as needed and mark each item as resolved.

1. Open the publication in Draft Space and open the Comments navigator .
2. Review each comment or suggestion and make any needed updates to the source. Use the arrow buttons to navigate to each comment.
3. Respond to the feedback:
   - **For a comment**, make the change if needed, click **Resolve**, select **Applied** or **Not changed** and click **Done**.
   - **For a suggestion**, click Apply proposed suggestion to the highlighted text if you want to accept it, click Resolve, select Applied or Not changed and click Done.
4. Change the workflow status of topics that have been reviewed. Select the dropdown showing the current workflow status of the topic (**To be reviewed**) and selected the desired new workflow status (**Review Complete**) from the dropdown.
5. Repeat until all feedback is resolved. Use the filter to find any unresolved comments.

Republish a Draft PDF in Organize Space

When you're satisfied that the review is complete, return to the publication in Organize Space and generate a final draft PDF for one last look.
